E-class number:	34-45-03-01	Gross weight:	9.50 kg
Customs tariff number:	94029000		

DATASHEET

CONREST KIT

The rescue stretcher CONREST KIT incl. fixation foot bag enables a quick rescue of injured persons from difficult to access and confined spaces. The short construction fixes the patient's head, spine, pelvis and arms with a particularly strong and stabilising webbing construction. Thanks to numerous handles, the CONREST KIT offers rescuers and emergency services many possibilities to move the casualty out of the danger zone. In addition, special suspensions can be attached to the carrying loops, which can be connected to a mobile sling system to rescue casualties from a manhole, for example. A clear colour system ensures quick handling: all anchorage points are marked orange. Pre-folded straps make the application very quick and intuitive. CONREST KIT has a stable and solid sliding plate that guarantees safe movement of the patient over edges or obstacles.

FEATURES

Colour:	Black, Orange
Minimum temperature:	-35 °C
Maximum temperature:	45 °C

MATERIAL

Material:	Polyester
